

March 15, 2021

Dear Author,

The review of your revised submission to *Demography*, MS# 2019-557-3, “Inequality in Place: Effects of Exposure to Neighborhood Level Economic Inequality on Mortality” is now complete. Based on the most recent revisions to your manuscript, we are delighted to accept your paper for publication in *Demography*.

Please make whatever additional changes to your paper that you would like (if any), and then send us the final draft that we can put in the publication queue. As you prepare the final draft, please do not add to the length of the text and do not include additional tables or figures. Send your revised manuscript to Yiwen Wang, Editorial Assistant, at demography@utexas.edu.

Instructions for formatting the manuscript are available at <https://www.populationassociation.org/demography/for-authors/preparing-manuscripts>. Please note the following when submitting the final version of the manuscript.

- The manuscript should be in Word or LaTeX format. Tables can be embedded in the manuscript file or in an Excel file. Figures can be embedded in the manuscript file, in an Excel file, or as .pdf file.
- The entire manuscript (except the appendices) should also be submitted in a single .pdf file, including tables and figures.
- All appendices (if any) should be submitted in a second pdf file. Please keep in mind that the appendices will only be published on-line and will not be copy-edited.
- The PAA office is working to highlight *Demography* articles through social media. In your email to Yiwen, please include a shortened version of the manuscript’s title (a maximum of 60 characters, including spaces) for use in PAA’s Twitter posts. Please also include, if available, the Twitter username of each author.

Should you have stylistic questions, please contact Laura Tesch, Managing Editor (tesch.editorial@gmail.com).

A couple of additional issues to be aware of are:

- 1) Authors’ may choose to use color figures because of on-line publishing. Should authors wish a paper copy, Duke University Press may charge a fee.

- 2) To help PAA offset the cost of the editorial and management service, we have instituted a standard per-article offset. We calculate this offset amount by taking a three-year rolling average of expenses minus anticipated income divided by the annual number of articles. The current offset rate is \$749. An invoice for this amount will be sent to you upon acceptance. **However**, our primary goal is to publish the best demographic research, and we understand that you may not have the funds for this offset. If you do not have institutional or grant support, we will waive the offset, no questions asked. Instructions on requesting a waiver will be on the invoice. If you have any questions, please contact the PAA office via email at offsetwaiver@popassoc.org.

Congratulations on a fine piece of work. We are delighted that you have chosen *Demography* as the outlet for your research.

Sincerely,

Shannon M. Monnat
